

MODULER & SKID *SYSTEMS*

ENGINEERED SOLUTIONS. BUILT TO PERFORM.

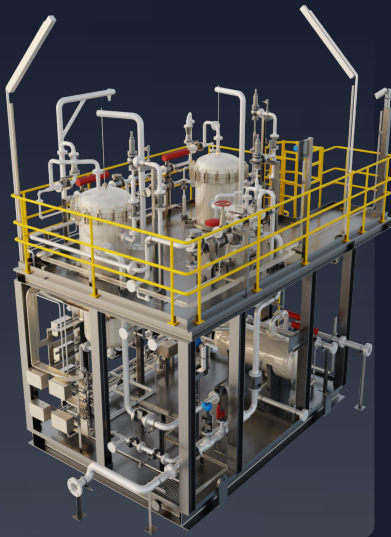

ENGINEER COMPLEXITY WITH **CONFIDENCE**

ERGIL delivers integrated skid & modular process solutions for demanding industrial facilities—combining engineering depth, fabrication capability, & dependable project execution.

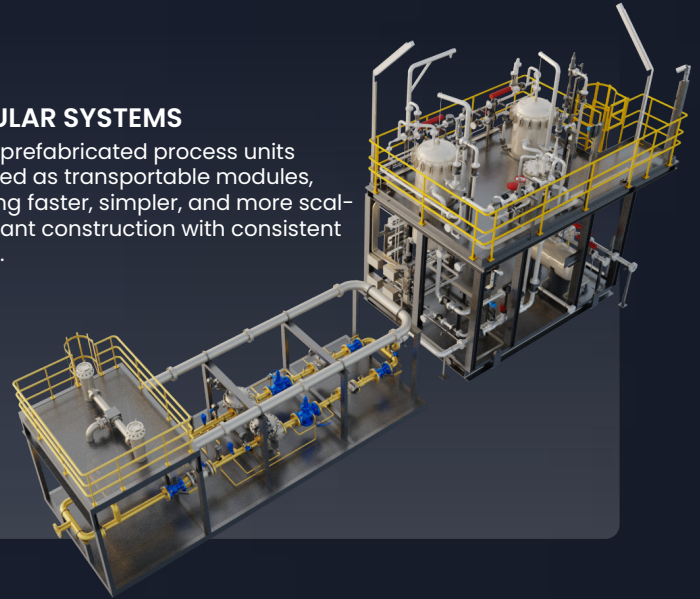

SKID SYSTEMS

Complete equipment packages on a single base frame, fully integrated with piping, valves, instrument, pumps, and controls for quick installation & commissioning.

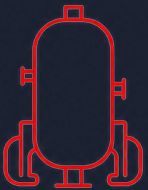

MODULAR SYSTEMS

Larger prefabricated process units designed as transportable modules, enabling faster, simpler, and more scalable plant construction with consistent quality.

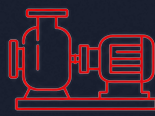

TYPICAL INTEGRATED SCOPE

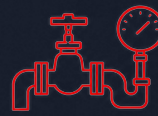

**PRESSURE
VESSELS**

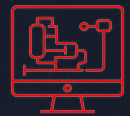

**HEAT
EXCHANGERS**

PUMPS

**PIPING &
INSTRUMENTATION**

**CONTROL
INTEGRATION**

WHY **ERGIL**

In-House Engineering

Process, mechanical & structural integration in one coordinated package

Advanced Fabrication Control

Factory-built assemblies produced under controlled quality conditions.

Proven Field Reliability

Designed for continuous operation in complex industrial environments.

Optimized Project Efficiency

Reduced site work, improved schedule control, & smoother installation
