

Mixer Vessels

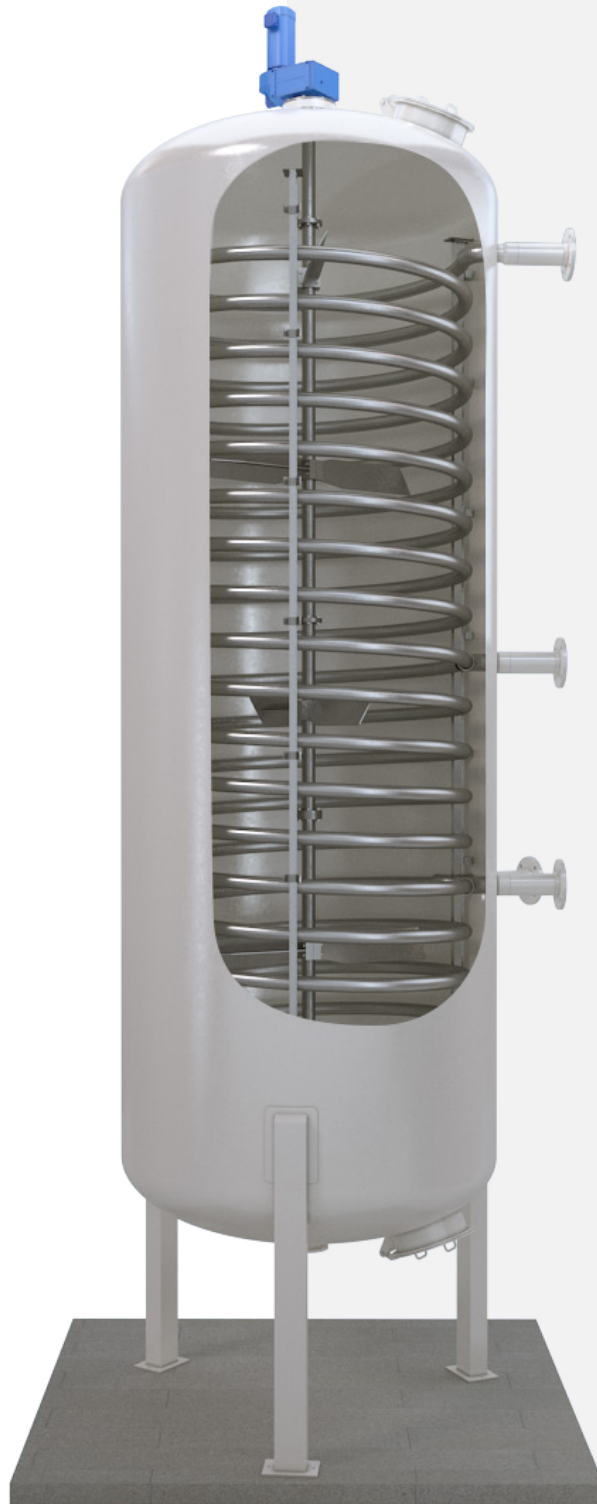

Product Description

Ergil®'s mixer vessels mix a wide range of materials used in different industries, they are mixed using different types of blades.

In its portfolio are Dry Blending Devices, Paste Mixing Designs for high viscosity products and high shear models for emulsification, particle size reduction and homogenization.

Key Features

- Ability to operate at different temperatures and pressures for mixing different solutions.
- Has internal or external heating systems added to them.
- Equipped with hydraulic or electronic start mechanisms so that they start and stop smoothly.
- No water carryover to the compressor.
- Continuous mixing can be done with a continuous processor, as it is easy to clean, consumes less energy, smaller footprint, versatility, control among many others.
